

5 Simple Steps To Get Your Website Rock'in

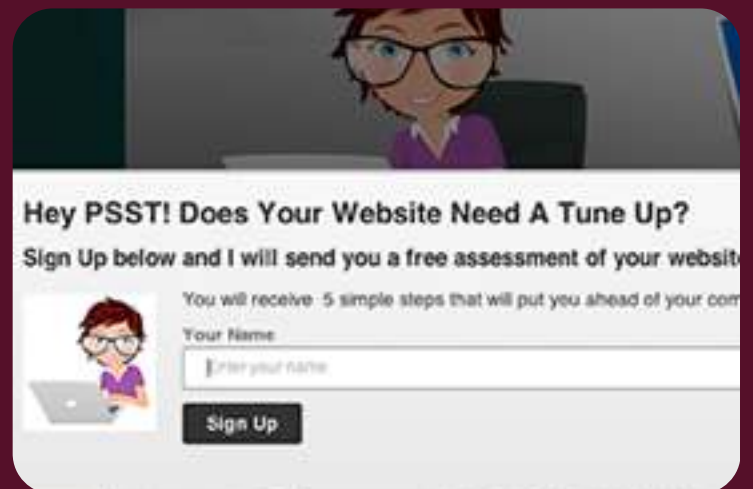

Step 1

Make sure you have an email marketing provider like [AWeber](#) or [Mail Chimp](#). I recently wrote an article on my blog about this topic: [Let's Get Serious about Your Website](#)

Step 2

Make sure you have a good sign up form on your website from either a plug in if you have Wordpress or use one from the email marketing provider like AWeber. If you want ready made sign up forms, AWeber is preferred over Mail Chimp.

Step 3

If you are designing your website or have an existing website, make sure you have a responsive website so your website can be seen on mobile devices and tablets. This is very easy to do in WordPress CMS.

Step 4

SEO of your website is very important and one easy thing you can do on your website is to make sure your title tag on your home page has strong key words for your business ranking on google. I would suggest putting these titles on each of the pages of your website.

Step 5

Want to know the traffic to your website? Want to see which pages they land on and for how long?

Google Analytics is free and can be installed on any website easily. If you will give you all kinds of great information. If you have a Wordpress website use [Google Analytics for Wordpress](#)

Thank's So Much

I hope you enjoyed these 5 easy steps to getting your website rock'in as much as I loved writing it for you. I can't thank you enough for the continued support of Creative Design Talent.

I appreciate you taking time out of your day to read this and if you have a minute, I would like to hear what you think about it.

Please leave a [comment here](#) or you can reach me in email as I read all the emails and comments from my subscribers.

If we aren't hooked up on Facebook, than head on over to my page [Facebook Fan Page](#).

I wish you continued success with your website and business
